
Part of a series on Lincoln's modern legacy of technology entrepreneurship

The Lincoln Historical Society presents

The Brothers Hatsopoulos: A Legacy of Science, Business, and Family

Sunday, October 20, 2013, at 2:00 p.m.

at *The Commons in Lincoln* (formerly *The Groves*)

Emigrating from Greece after World War II, John and George Hatsopoulos were students. In 1956, with a \$50,000 investment from a fellow Greek businessman, the brothers founded Thermo Electron Corporation. Providing technical instrumentation to a diverse research community, the firm is now known as Thermo Fisher Scientific, enjoys a \$32B a market cap, and employs nearly 40,000 people.

The remarkable story of the Hatsopoulos brothers is not limited to the success of Thermo Electron. The arc of time for this family shapes a legacy of science and entrepreneurship, courage and drive. Hear the story directly from featured speaker John Hatsopoulos. Come share your stories about the Hatsopoulos brothers, Thermo, and the technology entrepreneurs of Lincoln.

**Join us in Great Room at *The Commons in Lincoln* (formerly, *The Groves*)
on Sunday, October 20, 2013, at 2:00 p.m.**

Long-time Lincoln residents George (left) and John Hatsopoulos.

Directions: *The Commons in Lincoln* is the new name for *The Groves* senior living community. To get there, drive east on Route 2 from the intersection of Route 2 and Route 2A (Crosby's Corner). From there, the entrance is immediately on the right. Look for signs to guide you. The Great Room is located in the the Russell Building. Some parking next to the front entrance of the Russell Building is available and additional parking is short walking distance away.
